Ideawake Release Notes of Continuous Delivery

February 23, 2025

🚀Version 1.3 includes highest priority bugs and continuous delivery (CD) tasks

Here are the key implementations and fixes:

1. 'Assignee' filter now returns the correct results
2. 'Save' and 'cancel' buttons displaying on the 'about' tab
3. Added 'next' and 'previous' buttons on 'idea page' to toggle between ideas more easily
4. Issue with idea changing stage in background but user stays in previous stage specific tab
5. 'Go to' dropdown now displays in alphabetical order community names
6. 'Idea page' UX fixes and custom field history improvements
7. Click of action items email no longer directs user to accept invite even when they've accepted their invite (onClick of individual idea link)
8. Global search - searching in the same community then don't redirect to a new tab in chrome only if going to an external community
9. Last login on user list page export corrected

Detailed Notes For Each Task:

1. 'Assignee' filter now returns the correct results
   - Counts of users who are assigned to complete a stage in a workflow are corrected
   - Tested and Verified ✅

2. 'Save' and 'cancel' buttons displaying on the 'about' tab
   - Custom field save and cancel buttons appear as expected as before
   - Tested and Verified ✅

3. Added 'next' and 'previous' buttons on 'idea page' to toggle between ideas more easily
   - Ideas can be viewed on idea pop-up using left and right arrow buttons
   - Tested and Verified ✅

4. Issue with idea changing stage in background but user stays in previous stage specific tab
   - Users is redirected to the stage specific tab on the idea page for stage change
   - Tested and Verified ✅

5. 'Go to' dropdown now displays in alphabetical order community names
   - Community names now display in the dropdown in alphabetical order
   - Tested and Verified ✅

6. 'Idea page' UX fixes and custom field history improvements
   - History bar converts into the history icon right alongside the custom field label
   - History icon is visible when user hovers over the area of a custom field
   - User can now enable 'view more' on any idea currently opened, user navigates to another idea and system should remember that action of view more and every submission after that action appears with view more enabled
   - User now has the permission to see the alert inline to re enable comments on the idea
   - Tested and Verified ✅

7. Click of action items email no longer directs user to accept invite even when they've accepted their invite (onClick of individual idea link)
   - User now successfully gets redirected to the expected action item
   - Tested and Verified ✅

8. Global search - searching in the same community then don't redirect to a new tab in chrome only if going to an external community
   - Redirections are now improved when user searches something inside the community and it does not redirect to a new tab and user gets redirected when needed
   - Tested and verified ✅

9. Last login on user list page export corrected
   - Last login appears correctly for users with efficiency regarding exact time
   - Tested and Verified ✅
