

Ideawake Release Notes – Batch 40.9-CD

Release Date: 11/12/2025

CD Tasks:

1. ID-6864: Featured Image and anonymous submission options no longer enabled without admin input
2. ID-6529: Changed 'default' sort and added sorting options to the automations table page

Bugs Fixed:

1. ID-6543: UX update: streamlined multiple action item review process
2. ID-6873: Added a check before action item emails are sent out
3. ID-6865: Resolved UX issue when user manually changed stage of idea from a refinement stage to another refinement stage
4. ID-6902: Resolved Bug, Added back idea summary widget to challenge home page when additional brief enabled
5. ID-6989: Updated uploaded images name text length
6. ID-6862: Resolved, when clicking the "Save" button on the idea pop-up, the save button would change on frontend, but the API would fail

CD Tasks

1. ID-6864: Featured Image and anonymous submission options no longer enabled without admin input

- When the challenge is edited - Featured image and anonymous submission options toggle is set once.
- Now these fields will maintain their states as per the toggles set while editing challenge settings.

2. ID-6529: Changed 'default' sort and added sorting options to the automations table page

- Previously when an automation was updated, there was no success message. Furthermore there was no sorting option for admins to sort the columns in ascending to descending or high to low order.
- What's changed? As of now, we have a message appearing whenever an automation is updated. We also have a sorting key implemented on all columns except "status".

Bugs Fixed

1. ID-6543: UX update - Streamlined multiple action item review process

- When an idea is archived/deleted, the action item is removed from the dropdown menu (flag icon).
- If a milestone and task is moved back to 'To Do' then it reappears in action items to whom it is assigned.

2. ID-6873: Added a check before action item emails are sent out

- Action item emails for deleted ideas are no longer sent. Users will only receive action items emails for active ideas.

3. ID-6865: Resolved UX issue when user manually changed stage of idea from a refinement stage to another refinement stage

- Now the idea fields will display the fields of the newly attached stage and not the fields of a previous stage.

4. ID-6902: Resolved Bug, Added back idea summary widget to challenge home page when additional brief enabled

- Now when 'Additional Challenge Brief' is enabled - Idea card is displayed.
- When clicking the "View All" button, the system navigates to all submissions.

5. ID-6989: Updated uploaded images name text length

- In custom upload type fields, when a file has a too-long of a name - it will not overflow.
- We added a check to ensure if a file name is greater than 100 characters, it joins the first 30 characters and last 20 characters with ellipses.

6. ID-6862: Resolved, when clicking the "Save" button on the idea pop-up, the save button would change on frontend, but the API would fail

- Previously, when a user clicked on the 'save' button on an idea to bookmark it, the API was throwing a 503 error and the action was not performed.
- Currently when a user saves an idea, it is successfully bookmarked.
