

Ideawake Release Notes – Batch 41-CD

Release Date: 11/28/2025

CD Tasks:

1. Optimized design for the automations page
2. Edited custom fields inline on 'custom field manage' dropdown
3. Fixed monthly goal to track on counter gadget / Other counter gadget fixes
4. System now allows 'user' based counter gadgets to export results

Bugs Fixed:

1. Alert on workflow challenge settings modal no longer displays for admins
2. If the attachment name is too long, the UI is no longer disturbed

CD Tasks Details:

1. Optimized design for the automations page

- On selecting multiple paths, the paths are connected
- On editing 'path title', title now updates
- The link after + icon has been removed
- If there is only one condition in the path, now displays only one box with a condition written in it. Removed the extra outer box
- Optimized the loader in automation submission confirmation page

2. Edited custom fields inline on 'custom field manage' dropdown

- Now admins can successfully search custom fields
- Admins can have 2 option field values by default while creating a custom field of single select and multiselect type
- Now the enter button will add a new row of option field value rather than switching field type while creating a single select or multi select type custom field
- The cancel button is now left aligned when the user creates a new custom field
- A new button has been added save and continue for admins to add multiple custom fields at a time without closing the modal to save time
- The option field values are now editable for single select, multi select and user or groups

3: Fixed monthly goal to track on counter gadget / Other counter gadget fixes

- If the **monthly goal** is set to 1000 and the time period to 12 months, then the displayed goal will be 12000
 - Calculated result will be: Your Count / 12,000
- Comma added in the count
- Maximum number of decimal places added but not displaying at frontend

4: System now allows 'user' based counter gadgets to export results

- The export button is added in the user based counter gadget report

Bugs Fixed Details:

1. Alert on workflow challenge settings modal no longer displays for admins

- Permission check added, now alert messages are displayed

2. If the attachment name is too long, the UI is no longer disturbed

- The attachment name is reduced and managed within the section
