

# Ideawake Release Notes – Batch 41.1-CD

**Release Date:** 12/15/2025

## **Bugs Fixed:**

1. Spelling error - Visibility
2. Identified issues with bookmarks resolved
3. Added in average response option with average score in the table list page for scorecard criteria
4. Images no longer import when the 'featured image' is disabled on imported ideas when no submitter is listed in import file
5. When an import is performed and the submitter field is left blank on the import, the system puts in a ghost/anonymous submitter and the anonymous settings are enabled on the individual idea
6. Spaces in post updates are no longer removed when an email is sent out
7. Resolved & display issue
8. Analytics: The new challenge participation rate filter on the counter gadget is working correctly
9. Added inline images and links to files on the PDF print outs for idea exports

## **Bugs Fixed Details:**

### **1. Spelling Error - Visibility**

- Visibility spelling is updated in the “About” section.

### **2. Identified issues with bookmarks resolved**

- When ‘bookmarking’ an idea, and if that idea is deleted, it no longer displays deleted ideas on bookmarks landing page.

### **3. Added in average response option with average score in the table list page for scorecard criteria**

- System displays averages up to 2 decimal places and also whether this weightage refers to strongly agree, agree or disagree etc.

#### **4. Images no longer import when the 'featured image' is disabled on imported ideas when no submitter is listed in import file**

- There was an issue when anonymous posting was enabled, the feature image was disabled. Currently if a user adds an image while adding an idea, it will be saved successfully. When a user edits the idea or changes the anonymous toggle, there will be no effect on the feature image.

#### **5. When an import is performed and the submitter field is left blank on the import, the system puts in a ghost/anonymous submitter and the anonymous settings are enabled on the individual idea**

- Currently when a user imports the idea without a submitter name and without enabling anonymous, the system now checks that there will be no submitter attached to the idea and anonymous will not be shown.

#### **6. Spaces in post updates are no longer removed when an email is sent out**

- Post updates now send out with proper line spacing in the email.

#### **7. Resolved & display issue**

- & issue resolved

#### **8. Analytics: The new challenge participation rate filter on the counter gadget is working incorrectly.**

- The counter was not giving the correct results on adding in gadgets. The system is giving correct percentages now according to the number of people that are engaged in a challenge and who have posted ideas.

#### **9. Added inline images and links to files on the PDF print outs for idea exports**

- There was an issue that the print idea was not showing attachment links. Currently this issue is resolved and now all the attachments will be shown after print in the final pdf as links and upon clicking on the links the image will be opened as well as custom fields are also shown. If there is any upload in a custom field it will be shown like this too.
