

Ideawake - Release Notes of Continuous Delivery

July 07, 2025

 Version 1.3 includes highest priority bugs and continuous delivery (CD) tasks

Here are the key implementations and fixes:

1. Fixed issue with singular vs. plural for customizing challenges messaging
2. Copy and paste wasn't displaying line breaks when spaces were input into the workflow stage notification text field
3. AI training settings were turning off / weren't remembered when entered on the AI settings page
4. Vote count was not reflecting correctly on dedicated idea page
5. Finish standardization of action items assignment and connection between community workflow assignee and challenge level assignee settings
6. Allow attachments from the idea list page on the challenge home page to be a clickable link
7. Add Co Submitters and Team Member to column filter on table view
8. Removed the extra characters on username and custom fields

Detailed notes for each task:

1. Fixed issue with singular vs. plural for customizing challenges messaging
 - Custom challenge names will be displayed in plural
 - Tested and Verified 
2. Copy and paste wasn't displaying line breaks when spaces were input into the workflow stage notification text field
 - Split the message on breaks and add each part as a paragraph, so that the message shows in the correct format in emails
 - Tested and Verified 
3. AI training settings were turning off / weren't remembered when entered on the AI settings page
 - The source of AI Settings has been changed to source data from current community objects

- Tested and Verified 
4. Vote count was not reflecting correctly on dedicated idea page
- Vote count is now the same on idea modal and dedicated page
 - Tested and Verified 
5. Finish standardization of action items assignment and connection between community workflow assignee and challenge level assignee settings
- We will now modify the challenge assignee as per following criteria:
 - Apply to All
 - Yes, overwrite manually updated ideas and challenges: Update all challenge assignee settings
 - No, don't overwrite manually updated Ideas (and their challenges): Update the challenge if its idea is updated
 - Apply to Specific Challenges and Ideas
 - Yes, overwrite manually updated ideas and challenges: Updated all selected challenges
 - No, don't overwrite manually updated Ideas (and their challenges): Update the selected challenge if its idea is updated
 - Tested and Verified 
6. Allow attachments from the idea list page on the challenge home page to be a clickable link
- The users can now click on attachment text on the idea card and ideas can also be previewed
 - Tested and Verified 
7. Add Co Submitters and Team Member to column filter on table view
- Add Co-submitter & Team Member emails columns in the default export sheet
 - Tested and Verified 
8. Removed the extra characters on username and custom fields
- Modifications have been made to replace usernames from above mentioned areas
 - Tested and Verified
