

## Ideawake - Release Notes of Continuous Delivery

---

July 21, 2025

 Version 1.3 includes bugs and continuous delivery (CD) tasks

### Here are the key implementations and fixes:

1. Search results were not displaying results when they should display from the "go to" dropdown.
2. User search dropdown was returning results intermittently even when they exist.
3. When a user is removed as a submitter on an idea, the user no longer to receive 'commented on your idea' emails.
4. Aggregated hours / numerical custom fields were not working when using .5 / any decimal on counter gadget.
5. Saved table columns were not saved when the user refreshed the page.
6. UX update - Warn users clicking between 'refinement' tab and 'about' tab when they have unsaved data entered into the refinement tab.
7. Now able to open a 'view profile' in a new window vs. current window (idea page hover over user icon).
8. Team members data in endpoints.
9. Datpicker is now working correctly.

### Detailed notes for each task:

1. Search results were not displaying results when they should display from the "go to" dropdown.
  - The user can now search the required community & challenge in the 'Go To' functionality.
  - Tested and Verified 
2. User search dropdown was returning results intermittently even when they exist.
  - Users can now search the required username efficiently in the 'Manage Collaborator' section.
  - Tested and Verified 
3. When a user is removed as a submitter on an idea, the user no longer receives 'commented on your idea' emails.

- If an existing submitter is removed from an Idea and new submitter later add a comment. Then the removed submitter no longer receives emails.
  - Tested and Verified 
4. Aggregated hours / numerical custom fields now working when using .5 / any decimal on counter gadget.
- On editing a numeric field value and placing a .5 with it, the counter gadget value for this numeric field is being updated.
  - Tested and Verified 
5. Saved table columns were not saved when the user refreshed the page.
- When users 'edit columns' then columns are shown as selected even if the user refreshes the page or changes the page and comes back. It retains.
  - Tested and Verified 
6. UX Update - Warn users going in between 'refinement tab' and 'about tab' when they have unsaved data entered into the refinement tab.
- If the user clicks on 'Save Draft' and then enters more information, goes to another tab and comes back, then the entered data is saved.
  - Tested and Verified 
7. Now able to open a 'view profile' in a new window vs. current window (idea page hover over user icon).
- The user profile can be accessed from all the areas in the 'Idea Modal' where profile pop-up appears and also opens in a new tab.
  - Tested and Verified 
8. Team members data in endpoints.
- Team Member - User Object has been added in the opportunity/details API endpoint.
  - Tested and Verified 
9. Datpicker is now working correctly (experience improvements).
- Now when the datepicker input field is opened, the field becomes disabled and the user is not able to enter anything.
  - Tested and Verified
