

Ideawake - Release Notes of Continuous Delivery

August 06, 2025

 Version 1.3 includes bugs and continuous delivery (CD) tasks

Here are the key implementations and fixes:

1. Add Milestones and Tasks Data to API.
2. Bar Chart - Add in "Due Date" Filter for Stage Completion (just like we have for task completion today).
3. Team members issue when they're added from the refinement stage.
4. Make default comment visibility setting for all stages to "public".
5. Fix the Post Update Issue When. User Changes Targeting for on the Post Updates Page.
6. Allow users to customize default field labels (just like they are able to do today with custom fields).
7. When an idea is posted to the platform and the featured images are enabled - the system automatically pulls an image into the idea submission.
8. Export does not include data for custom fields 'hours saved per year' and 'Value of time savings' not included in export (see screenshots).
9. On clicking the profile image, the user profile page gets close and navigates back to challenge - Idea homepage.
10. Design PR of repositioning buttons.

Detailed notes for each task:

1. Add Milestones and Tasks Data to API.
 - Milestones - Object has been added in the opportunity/details, opportunity/{opportunityId} & opportunity/ API endpoint.
 - Tested and Verified 
2. Bar Chart - Add in "Due Date" Filter for Stage Completion (just like we have for task completion today).
 - Stage due date option added on x-axis and a new filter option for due date not yet due.
 - Tested and Verified 
3. Team members issue when they're added from the refinement stage.

- When a user is added or removed from defaults fields such as: Co-Submitters, Team Members, Owners. Then show the respective alerts for these.
 - Tested and Verified 
4. Make default comment visibility setting for all stages to "public".
- Comment visibility settings do not depend on global status selected, it will be public by default until the user changes it.
 - Tested and Verified 
5. Fix the Post Update Issue When. User Changes Targeting for on the Post Updates Page.
- Post update UI, audience options close as soon as we select individual users or groups.
 - Tested and Verified 
6. Allow users to customize default field labels (just like they are able to do today with custom fields).
- Customize Default fields (Owners, Team Members, Co-submitters, Tags) and also update their names for the updated places in the platform.
 - Tested and Verified 
7. When an idea is posted to the platform and the featured images are enabled - the system automatically pulls an image into the idea submission.
- Whenever an idea is posted & Feature image is enabled in the platform. And if the user doesn't upload any image while posting an idea then, apply an image relevant to the idea title.
 - Tested and Verified 
8. Export does not include data for custom fields 'hours saved per year' and 'Value of time savings' not included in export (see screenshots).
- Calculated custom field column details are now visible in the export sheet.
 - Tested and Verified 
9. On clicking the profile image, the user profile page gets close and navigates back to challenge - Idea homepage.
- No extra params are being sent in the user profile URL, when its opened from Idea Modal.
 - Tested and Verified 

10. Design PR of repositioning buttons.

- Buttons are repositioned on the ideal modal.
- Tested and Verified
