

## Ideawake - Release Notes of Continuous Delivery

---

August 25, 2025

 Version 1.3 includes bugs and continuous delivery (CD) tasks

### Here are the key implementations and fixes:

1. Activity log removed HTML data/text from activity log.
2. Action items display the newest item at the top from the action items dropdown on the navigation.
3. Auto progressing across action items now working.
4. Changed up ordering of roles on send invites page to be more intuitive (observer is below user).
5. Color dropdown corrected in appearance settings.
6. Experience for searching through ideas and getting redirected to the idea page from community dropdown now optimized.
7. Action item counter on the challenge analytics / community analytics and on the action items columns in the report matches.
8. Now able to edit the order of prizes.
9. Added labels to discern between default & non-default fields & now able to remove "Attachments" default field from idea submission form.
10. Replaced hard-coded texts with customized default custom fields names.
11. On removing a custom field data from the 'About section' of an existing or new idea, it shows an empty field.
12. Production DB hike issue.
13. Action items dropdown details no longer disappear when marking action for tasks as done.

### Detailed notes for each task:

1. Activity log removed HTML data/text from activity log.
  - The activity log section now displays correct data without HTML script in it.
  - Tested and Verified 
2. Action items display the newest item at the top from the action items dropdown on the navigation.

- New/latest 'Action Items' are now displayed on the top of "Action Items" drop down.
  - Tested and Verified 
3. Auto progressing across action items now working.
- Actions items when completed are now progressing to next stage automatically.
  - Tested and Verified 
4. Changed up ordering of roles on send invites page to be more intuitive (observer is below user).
- Now the roles will be displayed in the following order:
    - Admin
    - Moderator
    - User
    - Observer
  - Tested and Verified 
5. Color dropdown corrected in appearance settings.
- All 7 dropdowns are displayed correctly.
  - Tested and Verified 
6. Experience for searching through ideas and getting redirected to the idea page from community dropdown now optimized.
- The loader is shown when the user searches and selects a dedicated idea page from Global Search or notifications.
  - Tested and Verified 
7. Action item counter on the challenge analytics / community analytics and on the action items columns in the report matches.
- The correct action item count is displayed. Challenge analytics displays 'Open Count'.
  - Tested and Verified 
8. Now able to edit the order of prizes
- The prizes can be re-ordered or edited after being posted in a challenge.
  - Tested and Verified 

9. Added labels to discern between default & non-default fields & now able to remove "Attachments" default field from idea submission form.
  - “Default” keyword is added in front of ‘Default Fields’ in the challenge settings.
  - Now able to remove attachments for ‘post types’ at the community level settings
  - Tested and Verified 
  
10. Replaced hard-coded texts with customized default custom fields names.
  - Hardcoded texts for default Custom fields names can be replaced.
  - Tested and Verified 
  
11. On removing a custom field data from the ‘About section’ of an existing or new idea, it shows an empty field.
  - On removing the custom fields data, the field also is removed.
  - Tested and Verified 
  
12. Production DB hike issue.
  - Verifying DB hike by testing the following:
    - Exports
    - Idea Submission Emails & Digest Emails.
    - File Provisioning, and SAML login with valid and invalid profile custom fields data
    - Change Challenge, Challenge Leadership Board, Challenge Settings, Challenge List, Edit Idea and Idea Card List Page.
    - All Ideas Page
  - Tested and Verified 
  
13. Action items dropdown details no longer disappear when marking action for tasks as done.
  - The ‘Action Items’ dropdown is displaying details without any issue.
  - Tested and Verified
