

Release Notes – Batch 40.7-CD

Date: 10/01/2025

CD Tasks

- **Added "About" Information in refinement tab**
 - Added the following in the Refinement Tab:
 - Stage progress component modified
 - Added collapsible 'about tab' Info
 - Collaborators component
 - Relationships
 - Comments

- **Added columns to groups list CSV export**
 - Added the following columns in the user list export & group Export:
 - Last Login
 - Comments
 - Ideas
 - Points
 - Rank
 - Votes
 - Added in missing columns to BOTH the user list export and group export
 - Default Fields
 - Reports To
 - Employee ID
 - Profile Bio
 - Skills
 - Phone Number
 - Current Position
 - Department
 - All Profile Custom Fields as separate column

- **Added groups & info to profile page**

- If a user is added in a new or existing group, then the user group now displays in the profile 'about' section

Bugs Fixed

- **Manage users page no longer stuck on loading**
 - Providing users in the system via file provisioning, the file consisted of 30,000 users. The users page doesn't get stuck and are onboarded smoothly
- **Submitter shown as anonymous despite disabled anonymous posting**
 - When the admin has the following settings, then the user's name will appear and not be posted anonymously
 - Disabled anonymous posting
 - Make all comments anonymous by default
 - Make all votes anonymous by default
- **Custom field label updates not reflected in stage settings**
 - Updated the label of an existing custom field and confirmed the new label correctly displays in the "Assign by Custom Fields" section of the stage settings page
 - Added a new response option to a custom field and verified that the corresponding label is immediately visible in the "Assign by Custom Fields" section
 - Removed a response option from a custom field and confirmed that the removed label no longer displays in the "Assign by Custom Fields" section
 - Reordered the response options within a custom field and validated that the updated order is accurately reflected in the "Assign by Custom Fields" section
- **Fixes in Embed Widget**
 - On using escape characters in title & description of challenge, embed widget error is resolved

- **Problem Using Left/Right toggles between ideas**
 - On completing an idea question and then moving to the next idea, system now carries the previously filled data in the “please complete these questions” section

- **Right click enabled on Ideas**
 - The right click is now enabled on clicking on an Idea from the following places from both idea title and image:
 - Challenge view:
 - Table view
 - Swimlanes
 - Card view
 - Idea listing:
 - Card view
 - Table view
 - Swimlanes

- **Issue with posting challenges in new community**
 - Ideas & challenges are now posting successfully in new & old communities.

- **IUX fixes on Embed Widget**
 - The enable/disable toggle is working correctly for the Embed Widget.
