

Ideawake Release Notes – Batch 41.5-CD

Release Date: 03/10/2026

CD Tasks:

1. Added 'no results returned' on filters and columns edit options on list pages.
2. Added sorting options to the action items page at the challenge and community level action item reports.
3. Added "Most Recent Comment" column into the column options on the ideas list table page.
4. UX: Workflows are now alphabetized in all areas they exist.
5. Now able to remove star rating input.
6. Added additional columns to the ideas list table and idea export.
7. Dashboard reorder behaviour updated according to the new angular version.
8. Removed extra white space on drop down menu for single/multi select custom fields.

Bugs Fixed:

1. Workflow filter now updates list after changing an idea's workflow.
2. Images on the challenge update post displaying.
3. "I voted for" and "I'm Following" filters are now working.
4. Feature image enable check is now disabled.
5. Proper error message displays if the user saves 'No Action' stage in a workflow.

CD Tasks Details:

1. Added 'no results returned' on filters and columns edit options on list pages.
 - The "No Results Returned" message displays in search modals in add/edit filters and add/edit columns.
2. Added sorting options to the action items page at the challenge and community level action item reports.
 - Pagination added to the **Action Item Manager** on the analytics page both at challenge & community level.

3. Added "Most Recent Comment" column into the column options on the ideas list table page.

- There is now an option in the edit column named, 'the most recent comment'. This will display ideas with most recent comments.

4. UX: Workflows are now alphabetized in all areas they exist.

- Workflow names are now ordered alphabetically.

5. Now able to remove star rating input.

- Re-clicking the active star will clear the rating.
- Added a "Cancel" button at the bottom.
- Clicking "Cancel" should also remove/clear the selected rating.

6. Added additional columns to the ideas list table and idea export.

- The previous column has been added on the table list page and also added in the export file.

7. Dashboard reorder behaviour updated according to the new angular version.

- The analytics dashboard is reorganized in accordance with the latest angular version.

8. Removed extra space on dropdown for single/multi select custom fields.

- Empty space removed.

Bugs Fixed Details:

1. Workflow filter now updates list after changing an idea's workflow.

- A fresh fetch request is now triggered to retrieve the latest idea count whenever relevant actions occur. This ensures the displayed count remains synchronized with the underlying filtered data and accurately reflects the current state.

2. Images on the challenge update post displaying.

- The unsplash component is integrated in the post update functionality.
- Images are uploaded and displayed properly.

3. "I voted for" and "I'm Following" filters are now working.

- Previously "I voted for", "Saved By Me", and "I'm Following" filters were not working. This issue is now resolved and now all the filters are working and giving correct results.

4. Feature image enable check is now disabled.

- Feature image check in challenge settings is now showing as disabled after the user disables it from the dashboard.

5. Proper error message displays if the user saves 'No Action' stage in a workflow.
