

Ideawake Release Notes – Batch 41.8-CD

Release Date: 04/29/2026

CD Tasks:

1. Text no longer cuts off on submission form when selecting a response type for a custom field for a multi select field.
2. PDF preview page UX request - 3 dots now clickable.
3. Added loader and no results returned message on the 'Pending Invites' page on list load.
4. Added the 'active users' button on the 'manage users' page.
5. Searching for users via search bar has been optimized.
6. The platform now allows for MailTo: in custom navigation external link option.
7. Added ability to add new custom fields inline in Flatfile **import** process.

Bugs Fixed:

1. Idea counts are correct on challenge cards for private ideas.
2. Exporting user lists or group lists now exports full info user profiles.
3. Edited 'reply to comment' modal. No longer dismisses when the user offclicks.

CD Tasks Details:

1. Text no longer cuts off on submission form when selecting a response type for a custom field for a multi select field.

- Long option text in multi-select fields now wraps correctly within the dropdown container, ensuring full readability without overflow beyond visible boundaries.

2. PDF preview page UX request - 3 dots now clickable.

- The three-dot (⋮) menu on the PDF preview screen now displays the expected action options such as download, view, and other file-related actions upon user interaction.

3. Added loader and no results returned message on the 'Pending Invites' page on list load.

- A skeleton loader is displayed in the 'Pending Invites' section while data is being fetched, improving perceived performance and providing a smoother loading experience.

4. Added the 'active users' button on the 'manage users' page.

- With this update, an 'Active Users' tab has been added to the Manage Users page, allowing users to easily view and access currently active members within the system.

5. Searching for users via search bar has been optimized.

- With this update, community user search consistently sends accurate input to the API, even during rapid typing, ensuring results always match the entered query.

6. The platform now allows for MailTo: in custom navigation external link option.

- With this update, mailto functionality has been added to the Custom Navigation External Link option at both Community and Challenge levels, enabling direct email actions from navigation links.
- Admins can now trigger email clients seamlessly through configured links, improving accessibility and expanding navigation capabilities across both levels.

Bugs Fixed Details:

1. Idea counts are correct on challenge cards for private ideas.

- The challenge card displays an accurate and consistent count, ensuring it matches exactly what the user can see without discrepancies.

2. Exporting user lists or group lists now exports full info user profiles.

- Admin export functionality from 'Manage Groups & Users' has been verified to correctly reflect the same users as displayed on the platform, ensuring data consistency.

3. Edited 'reply to comment' modal. No longer dismisses when the user offclicks.

- Editing reply comments has been verified, and interacting outside the editor no longer causes the modal to close unexpectedly, ensuring a stable editing experience.
